Be present.
Keep what matters.

Vibe Dot is a voice recording device that captures your meetings, calls, and conversations, so you can stay in the moment and still keep every detail worth acting on later.

reddot winner 2026

The details that matter rarely wait.

What matters used to get lost, not anymore

Capture without breaking focus

Record hands-free, fully present instead of splitting attention.

Follow through without relying on memory

Turn conversations into summaries, decisions, and next steps.

Build a clearer picture over time

Connect related conversations in Vibe AI instead of scattered files.

Share a record the whole team can use

Searchable notes,
ready to review and act on.

Cut the re-explaining

Carry the context forward,
not just the outcome.

Take it anywhere work happens

Clip it on, attach it, or set it nearby.
Deliberate capture, anywhere.

Some moments are too important to lose

Meetings and decisions

Walk out with the decisions and follow-ups already captured.

Client conversations

Stay present with the client. Dot keeps the details you'll need later.

On the move

The site walk, the hallway, the idea in the car – caught before it's gone.

Vibe Dot pricing & plans

The device captures. Vibe AI does the rest. Every Dot starts with a free Vibe AI plan.
